PLAYERLYNC FOR WORKDAY HCM

Most HCM and Learning Management Systems are not built with the frontline in mind. Their mobile offerings often struggle to deliver content in low-connectivity environments and most of their core systems were designed for "desked" employees.

PlayerLync for Workday provides guaranteed delivery of current learning content to mobile devices, no matter your network or bandwidth challenges. With seamless offline playback, zero data loss and a smooth, consumer-grade app experience, PlayerLync enables frontline learning in the flow of work.

PlayerLync for Workday helps solve critical user experience, data continuity and employee adoption problems by extending Workday to the frontline - where they work and when they need it. Accelerate the value of your HCM investment and connect with your frontline workforce like never before.

	WORKDAY LEARNING	PLAYERLYNC + WORKDAY
Personalized, curated content	✅	✅

PLAYERLYNC

WHY PLAYERLYNC FOR WORKDAY

WORKDAY LEARNING

PERFECT FOR A DESKED WORKFORCE

Most HCM and LMS systems are great at providing training, professional development, and peer learning tools – particularly for employees who spend most of their day at a desk. But they are not built with the frontline in mind. Specifically, they lack the ability to provide critical training and information in the moment of need without disruption.

HIGH BANDWIDTH DEPENDENT

Many traditional HCM and LMS mobile applications often struggle in low-connectivity environments, resulting in employee frustration over lost learning data, video buffering and other challenges.

SLOW TO DEPLOY

Enterprise systems generally require prolonged, complex deployments that tie up your IT resources for long stretches of time.

PLAYERLYNC + WORKDAY

A MOBILE–FIRST EXPERIENCE

PlayerLync Workday Mobile Extension helps solve critical user experience, data continuity and employee adoption problems by extending Workday to the frontline - where they work and when they need it. Accelerate the value of your HCM investment and connect with your frontline workforce like never before.

ACCESSIBLE ONLINE OR OFFLINE

PlayerLync Workday Mobile Extension provides guaranteed delivery of current learning content to local devices, no matter your network or bandwidth challenges. With seamless offline playback, zero data loss and a smooth, consumer-grade app experience, PlayerLync enables frontline learning in the flow of work.

FAST SPEED TO VALUE

Extending your HCM or LMS system with PlayerLync is quick and seamless, with minimal IT effort required to hit the ground running – all without compromising the critical reporting and tracking data you rely on to manage your workforce.
